APPLICANT : MITSUBISHI MATERIALS CORP;

INVENTOR : USUI HIROO;

INT.CL. : B29C 45/33

TITLE : MOLD ASSEMBLY

**ABSTRACT :** **PURPOSE:** To incorporate an angular pin and a locking block in a stationary mold with a higher assembling accuracy to each other.

**CONSTITUTION:** A mounting base 36 having a mounting hole 37 is integrally formed in a locking block 34. An angular pin 38 is press fitted into the mounting hole 37, whereby the angular pin 38 is integrally incorporated in the locking block 34. The locking block 34 is fixed to a stationary mold 21 by a bolt 35. In this manner, a positional accuracy of the locking block 34 relative to the angular pin 38 is enhanced.
